MODERN EUROPE, from the Fall

of Constantinople to the Establishment of the German Empire, A.D. 1453–1871. By THOMAS HENRY DYER, LL.D.

This work, which has been for some time out of print, has been revised throughout for this edition, with the introduction of fresh matter and the introduction of new chapters, bringing the history down to the year 1871.

The book is not only of great interest and value to the general reader, but is also well adapted for students preparing for examination. Its use as a work of reference has been amply provided for by very full tables of contents to each volume, and a copious index to the whole. Those who may wish to make further researches will also find references throughout the work to the authorities which have been consulted.

STOCK EXCHANGE SECURITIES.

An Essay on the General Causes of Fluctuation in their Price. By ROBERT GIFFEN.

"A volume showing considerable research and power of thought." *Economist.*

"I would strongly recommend the perusal of this book to all those who are desirous to invest upon a sound basis of common sense, and more particularly to that class who invest not only in the expectation of obtaining interest upon their money, but with a view to the value of their investments increasing."—*Truth.*

"Mr. Giffen has made good use of his varied opportunities, and has given us a very valuable contribution towards the solution of problems which deserve from political economists more consideration than they have hitherto received."—*Saturday Review.*

"A very cleverly written and comprehensive essay." *Herapath's Railway Journal.*

"We have here an attempt by a thoughtful man to introduce something like order and law into the confusing and fluctuating phenomena of the Stock Exchange; and although we may not always agree with the writer's conclusions, we have always found that what he has concluded is the result of knowledge and reflection, and as such deserves to be carefully considered."—*Bullionist.*

"Mr. Giffen's book is an important one."—*British Trade Journal.*

"Mr. Giffen's new book—'Stock Exchange Securities'—is not a City book; it is a scientific treatise, and distinct addition to the European shelf of Political Economy.....The result is the work now published, which is intelligible and interesting to every educated man of business indeed, but especially suited to become a text-book for professors and students of Political Economy. It is written in an admirably clear and calm style, and wholly free from the slang and forced wit so often connected in the general apprehension with Stock Exchange subjects." *Financial Opinion.*

Price 10*s.* 6*d.*

On the ACTION of EXAMINATIONS

considered as a Means of Selection. By HENRY LATHAM, M.A., Fellow and Tutor of Trinity Hall.

(Cambridge: DEIGHTON, BELL, & Co.)

"Mr. Latham has placed before us, in a volume full but not heavy, one of the most valuable collections on the subject of Examinations which we have ever seen."—*Educational Times.*

"Mr. Latham's book, as we have already said, is certainly worth reading by all who are interested in Examinations." *Pall Mall Gazette.*

"We recommend not merely college dons, but statesmen who are forced to talk about University reform, and parents with heaps of boys on their hands, to study the book."—*Spectator.*

"Few men can produce more practical claims to be listened to upon such a subject.....Mr. Latham does not pretend to give a systematic history of Examinations, but simply to present their tendencies as they have in practice come under his eye."—*Saturday Review.*

MARTINEAU'S HISTORY of the

THIRTY YEARS' PEACE, A.D. 1816–1846. From never having been published in a handy form, this history has not attracted the attention which it merits. It contains a vast store of information, hardly attainable elsewhere, on all the great social and political questions of the important and interesting period of which it treats—a period separated by so short an interval from our own time, that to every educated person who takes an intelligent interest in the questions of the present day, a thorough knowledge of its history is indispensable.

STANFORD'S STEREOGRAPHICAL MAP of the BRITISH ISLES. Constructed to show the correct relation of their Physical Features.

The method employed in the construction of this Picture of the British Isles is that known as the Stereographic, or the art of representing solid bodies on a plane. In educating the eye to a correct perception of the superficial features of the land, it is necessary to use a symbol as nearly representing nature as the conditions of art will allow, which is accomplished through this method by *imitating vertical relief*, and producing upon the eye the impression of a model.
